

LATA 1978-1988

1988

1. **The effect of oxytocin on steroid hormone secretion by isolated porcine follicular cells in tissue culture.** Gregoraszczyk EL, Stokłosowa S, Tarnawska M, Rzasa. *J Anim Reprod Sci.* 1988;17:141-54.
2. **The effect of prostaglandin F2 alpha and its analogues on progesterone, estradiol and androgen production by the cultured bovine luteal cells.** Gregoraszczyk EL, Wojtusiak A, Różańska A. *Folia Histochem Cytobiol.* 1988;26(4):193-202.

1987

1. **In vitro sensitivity of rat ovarian follicles to the direct action of various hormones applied in particular stages of sexual cycle.** Gregoraszczyk E. *Folia Histochem Cytobiol.* 1987;25(1):17-22.
2. **Interakcja i regulacja hormonalna funkcji izolowanych komórek gonadalnych *in vitro*.** Stokłosowa S, Gregoraszczyk EL, Szoltyś M, Bilińska B. *Zeszyty Prol Post Nauk Rol* 339, 215-237, 1987

1985

1. **Response to gonadotropic stimulation of cultured rat luteal cells isolated from corpora lutea of early pregnancy. Cytochemical and biochemical studies.** Gregoraszczyk E, Wojtusiak A. *Folia Histochem Cytobiol.* 1985;23(4):253-9.
2. **Progesterone and androgen secretion by isolated cultured bovine corpus luteum cells: effect of LH, hCG, PRL, estradiol 17beta and testosterone.** Gregoraszczyk E. *Folia Histochem Cytobiol.* 1985;23(1-2):11-6.

1984

1. **Luteotropic action of estradiol-17 beta and gonadotropic hormones on rat ovarian cells in culture.** Gregoraszczyk E. *Endocrinol Exp.* 1984 Mar;18(1):43-52.
2. **Interaction of ovarian cells in vitro.** Stokłosowa S, Gregoraszczyk EL. *Tissue Culture and RES.* Rochlich P, Bacsy E. (eds) 447-460, 1984.
3. **Interakcja komórek osłonki wewnętrznej i warstwy ziarnistej pęcherzyka jajnikowego oraz komórek małych i dużych ciała żółtego w sekrecji hormonów steroidowych i ich odpowiedź na egzogenne hormony gonadotropowe.** Stokłosowa S, Gregoraszczyk EL. *Zeszyty Probl Post Nauk Rol* 309, 49-70, 1984

1983

1. **Effect of low intensity laser beam on steroid dehydrogenase activity and steroid hormone production in cultured porcine granulosa cells.** Gregoraszczyk E, Dobrowolski JW, Galas J. *Folia Histochem Cytochem (Krakow).* 1983;21(2):87-92.
2. **Steroid hormone release in cultures of pig corpus luteum and granulosa cells: effect of LH, hCG, PRL and estradiol.** Gregoraszczyk E. *Endocrinol Exp.* 1983 Mar;17(1):59-68.

1982

1. **Histochemical evaluation of delta 5,3 beta-HSD activity in two types of porcine corpora lutea and granulosa cells in tissue culture.** Gregoraszczuk E, Wojtusiak A. *Acta Histochem.* 1982;70(1):22-30.
2. **Estrogen and progesterone secretion by isolated cultured porcine thecal and granulosa cells.** Stokłosowa S, Gregoraszczuk E, Channing CP. *Biol Reprod.* 1982 Jun;26(5):943-52.
3. **Luteolytic effect of PGF2a on cells from porcine corpora lutea grown in tissue culture.** Gregoraszczuk E, Bilińska B, Stokłosowa S, Okólski A, Bielański W. *Zool Jb Anat.* 1982;107:197-204.

1981

1. **Do theca interna cells of the porcine ovarian follicles contribute to corpus luteum formation? Tissue culture approach using sorted ovarian cells.** Stokłosowa S, Gregoraszczuk E. *Cell Biol Inter Reports.* 1981;5:770.
2. **Enhanced multiplication and progesterone production by porcine granulosa cells cultured in a serum-free medium.** Stokłosowa S, Gregoraszczuk E, Holecková E, Michl J. *Exp Cell Res.* 1981 Feb;131(2):431-5.

1980

1. **The direct influence of stallion semen on progesterone production in cultured corpus luteum cells.** Gregoraszczuk E, Okólski A, Galas J. *Zentralbl Veterinarmed A.* 1980;27(9-10):788-95.

1979

1. **Some morphological and functional characteristics of cells of the porcine theca interna in tissue culture.** Stokłosowa S, Bahr J, Gregoraszczuk E. *Adv Exp Med Biol.* 1979;112:145-8.
2. **Sensitivity of Graafian follicles of immature rats to intra-ovarian injection of various hormones.** Gregoraszczuk E. *Endokrynol Pol.* 1979 May-Jun;30(3):277-84.

1978

1. **Growth pattern of the cultured porcine corpus luteum cells.** Gregoraszczuk E, Stokłosowa S. *Bull Acad Pol Sci Biol.* 1978 Nov;26(8):567-9.
2. **Some morphological and functional characteristics of cells of the porcine theca interna in tissue culture.** Stokłosowa S, Bahr J, Gregoraszczuk E. *Biol Reprod.* 1978 Nov;19(4):712-9.
3. **Some morphological and functional characteristics of cells of the porcine theca interna in tissue culture.** Stokłosowa S, Bahr J, Gregoraszczuk EL. *Ovarian Follicular and Corpus Luteum Function.* Channing CP, Marsh JM, Sadler WA. (eds) 145-148, Plenum Press, New York, London 1978.
